Micro-Needling With Derma™ £ 169.00 per treat/per area. Course of 3 £ 445.00

How does Derma FNS™ Work?

The Derma FNS™ uses vertical insertions to create thousands of tiny holes in the skin causing the release of serum growth factors which stimulate the breakdown of old fibrous collagen and stimulate new collagen and elastin development. This results in small injuries to the skin that are not noticeable. The skin then begins a wound healing response and as a result increases collagen and elastin improving skin appearance: • **Skin tightening, lifting and rejuvenating** • **Acne scars and wound healing**

• **Improving wrinkles and fine lines** • **Minimising pore size** • **Improving stretch marks** • **Treating alopecia.**

CRYSTAL CLEAR

CRYSTAL CLEAR MICRODERMABRASION

Offers a safe and controlled method of skin resurfacing by gently exfoliating the outer layers of skin. An excellent and progressive solution to open pores, blackheads, pigmentation, blemish scars, acne scars, stretch marks and much more.

The treatment also helps to increase new elastin and collagen fibres, resulting in a firmer texture and the gentle vacuum suction can also achieve an instant lifting effect on tired muscles. The treatment can be used all over the body to assist in the removal of ingrown hairs, congestion, scarring on back areas and also cellulite on the legs.

CRYSTAL CLEAR OXYGEN THERAPY

As we age, oxygen levels in the skin cells naturally decrease, leaving the skin less elastic allowing fine lines and wrinkles to appear. Crystal Clear Oxygen Therapy provides the ultimate in skin rejuvenation by replenishing this lost oxygen.

And that's not all; the oxygen serum is packed with active ingredients that help to restructure the skin and visibly plumping out lines and wrinkles. So you'll not only see immediate, visible results, but your treatment will go on working long after you leave, stimulating cell regeneration for a firmer, more youthful look.

Crystal Clear Oxygen Therapy can also help with acne prone skin thanks to the anti-bacterial effect of the serum, reducing the build up of harmful bacteria and reducing potential scarring.
